15 MR. FRAGOSA: My name is William Fragosa. I
16 live in Tecopa, California. I just wanted to say my
17 opposition to Yucca Mountain. My reasons are for many
18 of the reasons that you've already heard. I don't
19 really need to go over it. I've spoken here before. I
20 haven't heard anything that's convinced me otherwise
21 that it's still a good project.

22 And where do we go from here? That's what I
23 am asking, because this isn't anything that's good for
24 the life outside these doors or for the people inside
25 here. They've spent a lot of money on this already.

1 You've got a big hole and all I hear is opposition. So
2 I hope that's being heard. Thank you.

13 MR. FRAGOSA: My name's Willie Fragosa, I
14 live in Tecopa. I just have one, one word for comment.
15 Sustainable. You know, for thousands of years, the
16 Western Shoshone have lived in a sustainable way. The
17 Paiute people have lived in a sustainable way. That
18 means that the life that they're living goes on because
19 they're not using everything up. That means that
20 things are renewed. What we're dealing with here is
21 not sustainable.
